

# Welcome to our Myrtle Trace web site for 2024!

<https://myrtletracesc.org/>

On December 7, 2024, we updated our web site design to take advantage of improved web site design technology and to improve the security of our system. The navigation is similar to what you have been used to seeing. Here are a few differences:

- The new web site has been developed using improved security options to better protect our system and its users. In order to improve privacy for our residents, the Board has decided to remove pictures, phone numbers, and email addresses from the pages for our board members and committee members. Read our news letters and other communications to find the contact information that you may need. Note that all the reports displayed from our web site present the the same PDF files that we used in our previous web design, without any modifications.
- To simplify navigation, the menus offer 5 years of reports going back to 2020.
- We have removed the Photo Gallery from the menus. The gallery was dependent on community members having to maintain either free or paid accounts on various photo web sites such as shutterfly that required additional logins to access the photos. To improve security for our members, the Board decided to remove those links from our web site.
- We moved the “Myrtle Trace Forms” link from the top level menu and placed it under the “Homeowners Resources” menu.
- We deleted the “Other Useful Links” menu selection from the “Homeowners Resources” menu. The Board can decide to redesign that page if it is needed.
